shopdata.com

New Roof Curb Adapter fabrication Module with the most commonly used curb adapters.

Our QuickDuct Curb Adapter package's powerful features take the manual effort out of laying out your roof top curb adapters and baffles. With a comprehensive library of the most commonly used curb adapters you get everything you need to design, layout, and nest your curb adapter jobs.

It includes all of the "extras" you would expect in a system developed by sheet metal experts. You can even modify the finished curb adapters for special applications by using our powerful CAD drawing tool. You can place holes, chop pieces, scale or stretch, and even merge two patterns.
